It is used primarily as a monomer to manufacture many different types of polymers and copolymers and as a chemical intermediate in the production of industrial chemicals. 1,3-Butadiene - Wikipedia 1,3-Butadiene is the organic compound with the formula (CH₂=CH)₂. It is a colorless gas that is easily condensed to a liquid. It is important industrially as a monomer in the production of synthetic rubber. The molecule can be viewed as the union of two vinyl groups. It is the simplest conjugated diene. Although butadiene breaks down quickly in the atmosphere, it is nevertheless found in. Safety and Health Topics | 1,3-Butadiene | Occupational ... 1,3-Butadiene ranks 36 th in the most produced chemicals in the United States. Three billion pounds per year are produced in the United States and 12 billion globally. 1,3-butadiene is produced through the processing of petroleum and is mainly used in the production of synthetic rubber, but is also.

1,3-Butadiene - US EPA 1,3-Butadiene 106-99-0 Hazard Summary Motor vehicle exhaust is a constant source of 1,3-butadiene. Although 1,3-butadiene breaks down quickly in the atmosphere, it is usually found in ambient air at low levels in urban and suburban areas. 1,3-Butadiene - National Cancer Institute 1,3-Butadiene is a colorless gas at room temperature with a gasoline-like odor. It is used to produce synthetic rubber products, such as tires, resins, and plastics, and other chemicals.
